

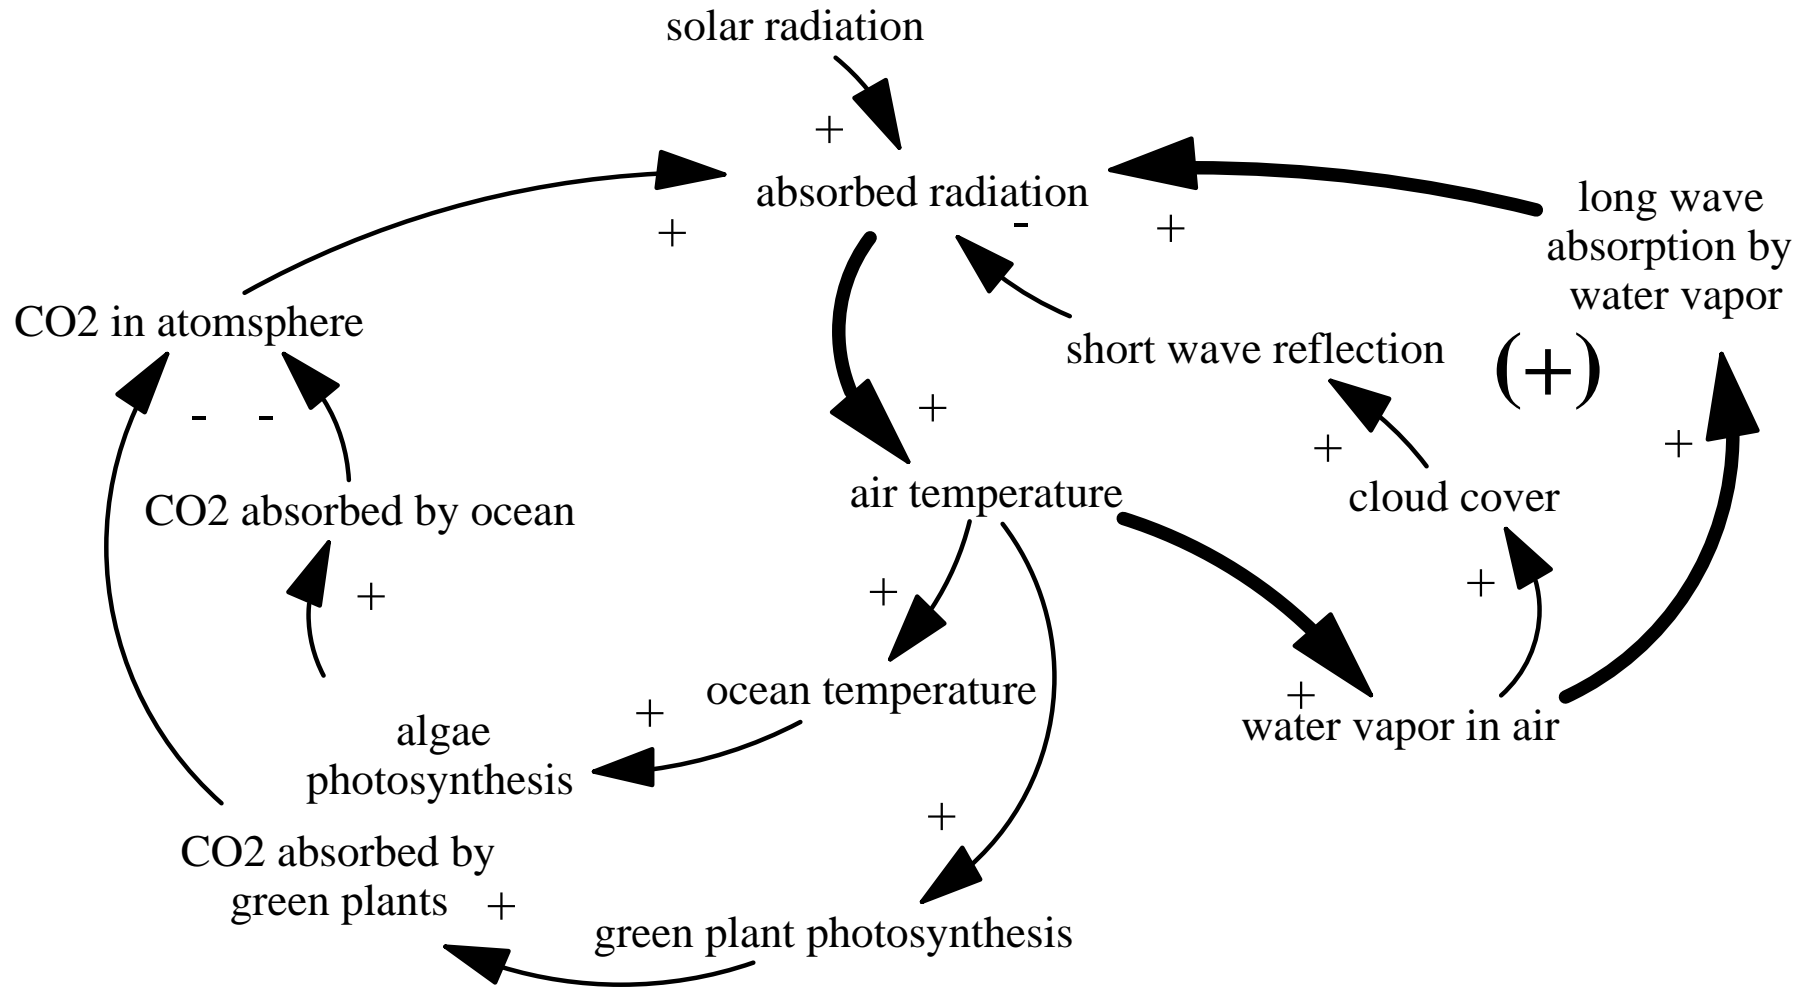

Figure 8.5. Positive Feedback Acting through Long Wave Absorption – This diagram is fine.

This diagram on the top of page 93 is drawn correctly and clearly. I show it first to help the reader spot an error in the more complicated diagram on the bottom of page 93

Figure 8.6. Improvement and Correction

To improve the clarity: move the + on the arrow from “CH4 in atmosphere” to “absorbed radiation to above the arrowhead. Then do the same to the – on the arrow from “reflection of radiation from permafrost” to the “absorbed radiation.”
